

Lab Activities:

Task 1: (Links and layout customization) Create a page with the URL '/books/html5/links' to display the following. You should use external CSS (main.css) with class and id for styling purposes (having padding, text center, text color, background color, and display as a block). Also, you should add different styles to each state, which a link can have, such as visited, hover, and action.

Task 2: (Text formatters (nested formatters)) Create another page with the URL '/books/html5/text/formatting' to display the following. You may use the external CSS file 'main.css' to add style for the h1 tag that contains 'Example of Formatting tags'

Example of Formatting tags

This text has **subtext** using b tag

This text has **subtext** using strong tag

This text has *subtext* using i tag

This text has *subtext* using emphasize tag

This text has subtext using small tag

This text has **subtext** using mark tag

This text has ~~subtext~~ using del tag

This text has subtext using ins tag

This text has X_{subtext} using sub tag

This text has X^{subtext} using sup tag

Task 3: (Listing (nested)) Create a third page with the URL '/books/html5/listing' to display the following. You may also add style to the external CSS file 'main.css'
